iControl Networks Powers Comcast's XFINITY® Home Security Service

First Broadband Service Provider Introduces New National Service Based on iControl's OpenHome™ Software Platform

Palo Alto, Calif. (June 9, 2011) - [iControl Networks](#), a leader in broadband home management, today announced its OpenHome™ software platform is powering Comcast's XFINITY Home Security service.

Comcast's XFINITY Home Security service provides intrusion and fire protection in addition to a host of interactive features including home monitoring, home management and energy management services, with the added benefits of web and mobile access.

"Comcast is the first national broadband service provider to launch iControl's software platform, bringing greater peace-of-mind to millions of homeowners who can now know that their homes and families are protected whether they're home or away," said Jim Johnson, co-CEO of iControl. "This is a momentous day for iControl and we are very excited to be a part of Comcast's initiative."

XFINITY includes an interactive, easy-to-use touch screen security panel that has been certified to meet UL standards for dual-mode broadband and cellular connectivity to the Central Monitoring Station. Other features and equipment include extended battery backup, video monitoring, lighting control, custom text and email alerts, 24/7 monitoring, thermostat control and remote arm/disarm.

"Consumers have responded enthusiastically to early market deployments of XFINITY Home Security service," said Mitch Bowling, Senior Vice President and General Manager of New Businesses for Comcast. "We're thrilled to be adding another value-added service to the XFINITY bundle and we're confident that this next generation solution will be of great interest to our customers."

About iControl Networks

iControl Networks is a venture-backed software and services company providing interactive solutions defining the broadband home management market. The iControl OpenHome™ Software Platform, an award-winning software solution that has made the Connected Home a reality, enables home security companies, broadband service providers and utilities to offer the next generation of home management, security and connectivity to their customers.
